Figures

No table of figures entries found.

Tables

Table 1.	Title of the table, no reference
Table 2.	Title of the table, no reference

1 Audio Team

Level Composer: Sanni Ouli

Boss Composer: Severi Boesen

Sound Designer: Aapo Vanhainen & Kimmo Riipinen

Sound Recording: Aapo Vanhainen & Kimmo Riipinen

Voice Over: Milla Koivuniemi

Sound Quality Assurance: Aapo Vanhainen

Audio Programmer: Aapo Vanhainen

2 About the Game

2.1 Genre:

Action, First-person, Fast-paced.

2.2 Benchmarks:

Ultrakill, Castlevania, Doom 2016 / Eternal.

2.3 Target audience:

2.3.1 Demographic:

[describe the game's target demographic]

2.3.2 Interests:

[list the target demographic's interests]

2.3.3 Persona:

[describe in details an imaginary person who is the perfect example of your target audience. What's their name? Genre? What does a common day in their life looks like? What are their ambitions? This research is usually provided by the developers]

2.3.4 Game Team:

- Product Owner: Charles Silvennoinen
- Producer: Aapo Vanhainen
- Game Designers: Aapo Vanhainen, Charles Silvennoinen, Emilia Hietikko

- Programmers: Kimmo Riipinen, Jesse Kauhanen
- Art: Charles Silvennoinen
- Quality Assurance: Kimmo Riipinen

3 Audio Pillars

3.1 Game Design Document

Exsanguination's core mechanics revolve around intense, fast-paced melee combat, where movement is critical for survival. More information in the Game Design Document provided here: [Exsanguination_GDD.docx](#)

3.2 Audio Experience

The audio will immerse players in a gothic fantasy world, characterized by dark, ominous soundscapes punctuated by moments of extreme violence and gore.

3.2.1 Combat Music:

Fast-paced, dynamic tracks will accompany the player through battles, featuring heavy drums, distorted metal guitars, and choir-inspired harmonies for a fusion of baroque and modern metal.

3.2.2 Hallway Music:

Between combat, the audio will shift to atmospheric, eerie hallway music, setting the tone of dread and anticipation as players traverse dangerous, unknown areas.

3.2.3 Finisher Audio:

Finisher moments will be punctuated by distinct, visceral sounds—such as a low, fading music track, followed by a climactic short music piece to signal the player's triumph.

4 Benchmark Analysis:

4.1 References:

4.1.1 ULTRAKILL:

The Death Of God's Will is a major reference for combining intense combat music with adaptive audio.

4.1.2 Baroque Elements:

Organ, choir, cembalo, and strings bring a historical depth.

4.1.3 Metal components:

Drums, bass, and lead guitar add modern *and heavy* intensity.

4.1.4 Piano:

Piano serves as a grounding instrument, contributing to both atmosphere and tension. Benchmark analysis

4.2 Musical structure

Music starts with intro, goes into the loop and stops only when changed to boss music or if player dies and goes to death music. Music also can stop and go to menu music if player goes to main menu during gameplay. If player dies during boss fight the music is reset and continues from the loop. Boss music consists of 3 different loops, one intro and one bridge between second to last and last loop.

4.3 Sound effects (texture, style, dynamics)

4.3.1 Player SFX

4.3.1.1 *Movement*

- Footstep
- Jump
- Take damage
- Heal
- Die
- Dodge
- Parry

4.3.1.2 *Melee weapons*

- Sword swing (more than one maybe)
- Sword hit on wall/floor/enemy
- Special weapons
- Throw/use
- Hit enemy/anything

4.3.1.3 *Special skill*

- Grappling hook
 - Throw
 - Hit
- Stake
 - Throw
 - Hit

4.3.2 Enemy

- Footstep
- see player
- Attack player
- Projectile fly
- Take damage
- Die

4.3.3 UI

- Menu click

4.3.4 Level

- Interactions
- Door open/close
- Pull lever
- Pick up item

4.4 Main dynamic audio behaviours

Player has option to finish an enemy, when they do, the music track fades to low volume, the finisher audio rises to 1 and is played, after the finisher audio, the music track crescendos back to normal volume.

5 Sound Identity

5.1 Priorities

What is the order of importance on each audio element in the game? This should change depending on the project's needs:

1. SFX
2. Music
3. Voice Over

5.2 Music

5.2.1 Style/Genre:

Gothic metal

5.2.2 Instrumentation:

5.2.2.1 *Baroque Elements:*

Organ, choir, cembalo, and strings bring a historical depth.

5.2.2.2 *Metal components:*

Drums, bass, and lead guitar add modern *and heavy* intensity.

5.2.2.3 *Piano:*

Piano serves as a grounding instrument, contributing to both atmosphere and tension. Benchmark analysis

5.2.3 Production Philosophy:

specify the music production stages. Will you record live instruments? Will you hire musicians, assistants, or other related services? Or will everything be done *in-the-box*? Will there be a mockup phase before creating the final assets?

5.3 Sound Effects

- Weapons
 - Sword equip 1
 - Sword Swing
 - Successful parry
- Equipment
 - Bomb
 - Silver bomb explosion
 - Caltrops drop
 - Grappling hook
 - Grappling hook shoot
 - Grappling hook hit
 - Grappling hook ready
 - Stake
 - Stake throw
 - Stake pick up
 - Stake finisher
- Level
 - Door open/close
 - Lever pull
 - Large object move
 - Fall into pit
- Player
 - Heal
 - Over heal
 - *Boost potion sound?*
 - Player die
 - Player take damage
- Enemy
 - Enemy take damage
 - Enemy see player
 - Enemy die
 - Enemy projectile fly
 - Enemy projectile hit
 - Enemy attack
 - Melee
 - Ranged
 - Spit?
 - Demonic whoosh
 - Enemy stun
- Boss
 - *Pirouette*
 - *Blood service grasp*
 - *Spike growth*
 - *Firewall*
 - *Hellfire*

- Sting
 - Ready to block
 - Finisher
 - Successfully find hidden room
- UI
 - Menu click

5.3.1 Equipment and Recording

5.3.1.1 *Kimmo's equipment at home:*

- 2 sparring swords
- Other sparring equipment (armor)
- Tools
- Recorder (flute)
- Cardboard
- Old clothes
- Vegetables
- Fruits

5.4 Technology

5.4.1 Engine:

Unity.

5.4.2 Middleware:

None.

5.4.3 File Format:

.ogg

5.4.4 Platform:

PC.

5.4.5 Data budget for audio:

50MB.

6 Sounds
